## Comment text:

I disagree with the possible impact on Stroud from this proposed change. It makes no sense to divide a coherent close knit community which includes the hospital and many local other amenities in the Trinity area. I understand the proposed new boundaries would result in two district councillors for the town of Stroud, one of whom will have no relationship with this part of Stroud, also their remit will be affected by the very different needs of a larger ward which includes a more rural area and which differs greatly from the urban nature of Stroud. How is there any advantage for Stroud? Why divide the town administratively? A cynic might think it is to do with votes. Would they have a point?9
