I would like to propose that the commission considers grouping all of the areas of The Herringtons into one electoral area, allowing us to have single representation, something that we don't currently have and does cause some problems and confusion for residents.

I understand that the current arrangements will see us grouped with Plains Farm instead of being grouped with the rest of the community which I think is a shame and does not reflect how our community works. We are linked into the Herringtons in a number of ways including community groups and churches.

Having looked at the proposals I would like to suggest that the border of the new ward is made at Railway Terrace in Herrington and that you use the old railway line as a natural border. This is now a public footpath and is well used but is also seen as a border between the 'old' Herrington and the 'new' Herrington communities. I believe that if Farringdon was also included in this ward then the proposed numbers would be appropriate.

I also think it is a shame to see Gilley Law/Lakeside added to Silksworth area as this is a very distinct area in itself. It is probably closer to the Plains Farm community.
