Related subject: Cottingley

I'm a resident of [REDACTED]. I have just received information about a proposed boundary change for representation of council areas.

What please is the point of splitting a community which as a whole for so many years being a united community dealing with one council representative. It's not as there is a huge divide between the areas you propose to split. Living on one side of the estate to be ordered by one council and the other by another. This is Cottingley as a whole and can see no viable reason for the split of authorities.
