The changing of the boundary which proposes dividing the bottom part of Purfleet Road plus the houses along London Road to become part of Purfleet on Thames is not what Aveley residents who live there want. This was evident from a public meeting held at Aveley Football club last week. The previous Conservative council did not communicate effectively or consult properly with Aveley Residents on the boundary changes as most of those present were not aware of the proposed changes. With regard to those proposed changes to redraw the council ward boundaries - The A1306 is the natural boundary for Aveley and should remain so as the boundary of the ward needs to be the same as the boundary of the village. Changing the name of the ward to Aveley is fine but perhaps a better option would be to rename the ward Aveley and Kenningtons as Kennington residents have long been part of Aveley. . It appears that if residents do not have internet access then they are not informed in other ways of the proposed changes. Thurrock Council need to have a "blended approach" so that information reaches everyone and the format should be in plain language that everyone understands.
