**Related subject:** Aveley Boundary Review

As a homeowner at the bottom of Purfleet Road. There is no point wasting more council money changing boundaries especially as the whole of Purfleet Road has always been a part of Aveley. And the people that are working on this should be doing more important things for the area and Thurrock. How about stopping motorised vehicles driving through the bollards at the end of Purfleet Road and on the pavements. Stopping drug dealing and anti-social behaviour outside the houses and parking over people driveways and going to the cafe. Which nobody is taking responsibility for ie the Police or the council. Money would be better spent on Policing or doing something for the residents on this piece of road then messing about wasting council tax payers money on boundaries and and splitting one road in half. We're not even on the same side of the road as Purfleet.

Please feel free to contact me, councillors or council.

Photos show the damage caused to my car and caravan after I told some Asian lads to stop urinating on the grass between 2 houses (picture also attached). Called the Police and they didn't want to know. The lads came back later that night and threw beer bottles at house, car and caravan. Police still didn't want to know. Try spending the money on practical things for residents ie. CCTV and Policing. Might stop the anti-social behaviour, drug dealing and motorbikes driving on pavements and terrorising the residents.
