Related subject: Colne Valley

Having read the proposed boundary review re the Colne Valley West & East wards, as a resident of Golcar I cannot see how this could not be incorporated in Colne Valley East, also any resident of Bolster Moor or Scapegoat Hill would be very insulted to find themselves included in the proposed Lindley area when they are both part of Golcar.

As for the Paddock area this is definitely part of Huddersfield & has never been classed as part of the Colne Valley.

The whole thing smacks of someone or an agency who know nothing of the area but decides who or what goes where with a high handed authority.

Any resident of the area looks back with longing for the days when we had local accountability by having truly local councils, ie the Colne Valley was a totally independent council, Huddersfield council began part way down the A62 road, where a sign used to proudly proclaim- Welcome to Huddersfield.

Edward Heath should have been hung, drawn & quartered for his interference & belief that if the councils were thrust together there would be saving in money & manpower, nothing could be further from the truth, waste, poor management, proliferation, the whole area is a shadow of itself, councillors who know nothing of the area & its history make decisions with no regard to the consequences of their actions & you can't even vote them out as they don't live in the area.
