## Comment text:

The change in my area (Trimdon) to chop large areas of the green space is beyond upsetting. The areas of green I face towards are beautiful and used commonly by local people, walking dogs, playing football and enjoying nature. I believe we need to protect this area at all costs as it is going to affect the serenity and peace of my home, which is a main reason for purchasing the house a few years ago. I think this change will affect so many people negatively and will definitely affect my mental health too. The stress of the change will not only be current, but in the future when I may potentially want to sell my house, this obstruction of very close buildings will decrease the value of many peoples houses. It will additionally affect the traffic around our area which is already such a build up. People are going to resent living here and will no longer be a peaceful idyllic place to live. I beg you not to build on the green.
