Related subject: The move of large green areas into Stainton ward

This should not happen as this wards population is no where near the green spaces planned on being moved. This would result in changes being decided on by people it would not affect. People who this would directly affect would not be consulted in matters. There is no need to move an area of green space into another ward as it does not affect the population number in each ward. There is no public benefit to this proposal and would out local areas at risk without proper consultation of residents.
