**Related subject:** South-West Middlesbrough Brookfield & Trimdon, Hemlington and Stainton & Stainsby Hall Farm

The proposed change to the boundary line regarding "Newfield crescent" seems a little strange. The changes are to even numbers throughout the Trimdon /Stainton wards but as nobody lives in the woods adjacent to Newfield Cres it would not fulfil the requirement unless planning permission has already been granted for this field. The field has been tended to by the residents of Newfield crescent for over 40yrs, with litter picking , dog fowling nuisance, nuisance individuals, arson etc being controlled by the residents and ward councillors. The proposal would mean that a Trimdon ward Councillor would not get involved with he field as its not in his boundary control and the ward Councillor for Stainton would not have any input from residents in a area not under his control. This would leave a local and heavily used Park/Beauty spot with Fox, Vole, Deer and many other wild animals left to rott as with many of Middlesbrough's greenbelt commodities. This land would be starved of focus and would ultimately be left uncared for by MBC. This is not acceptable and further more it would be a major loss to the people of Acklam who use this field daily.
