**Related subject:** NE lincs

We do NOT want the building going ahead on these lands. The biodiversity will suffer an existential adverse ramification as a result - take a look up on the local chalk stream - only one of 200 exist, today. Interestingly, the councils push for a greener state - how is this green? Furthermore, we, the people - who you're supposed to represent - are facing a substantial amount of ignorance from yourselves. We, The People also know and understand that white working class English native citizens will not benefit from these builds. We know that migrant men are the in the favour - as requested from the money machine generated by the political class. We know the social ramifications and unrest this will drive. It is axiomatic in the crime inflation and stabbing crises. We did not sign up for this. We know exactly where our council tax is going, for example to fuel proxy wars and men of fighting age coming into the country. We, the people will not tolerate this.

You have been told.
