Related subject: Removal of freshney ward as a boundary area

Ive lived in freshney ward most of my life and cannot understand why you would consider this as an option. The freshney ward area is large, it has houses and occupants of all demographics. Schools and public services, therefore needs representation as an individual area. I do not see any sense in the justification for removal of this area and combining it with others making it even larger, other then self interest somewhere within the council
