Related subject: Review of the number of wards in N. E. Lincs.

The Freshney ward is being proposed by conservative councillors to be dissolved. This would be a stitch up by the council who only want this so they can get rid of the three independent councillors in the ward. Freshney ward has a proactive community who take pride in their area and regularly engage in organised litter picking organised through formal social media groups. The ward councillors work very well with residents helping to improve the areas road safety and are actively involved with various community groups to help them receive funding or to have improvements carried out. I feel it is important to let the boundary commission know that the ruling party of conservatives are playing political games to oust councillors who are working together with Freshney residents to improve their area and community relations. This can't be allowed and needs looking into as it is not being done in the best interests of local people but just to help a political party retain power in the council.
