Comment text:

Related subject: Freshmen ward

I have to give my opinion on this matter as yet again decisions are made which completely go against the thoughts and feelings of the majority within the area that is subject of change. Our wards are well represented by the independent councillors. The vast majority of resident are working class and voted them in. There are no issues within the wards to warrant any changes and if the council thinks there is, why has this not been clearly communicated to the residents prior to this issue coming up. People are fast losing patience with being done to all of the time. If the council is considering ward changes they should let the residents decide during a fair election process instead of forcing it upon us.
