## Comment text:

**Related subject:** Freshney Ward Grimsby

Freshney has a longstanding community. I'm shocked by the council leaders comments that they are separate. Indeed they share a local secondary school, church parish and amenities. Many people grow up on either the Great Coates, Wybers or willows estates then purchase their own homes within the freshney boundary as it is seen as one area. It makes no sense that there is a road between them makes them separate which the current council claim is the main reason for the divide. Yet wanting to link them with Yarbrough or west marsh and splitting them into these communities which are further away geographically and in terms of economic division seems ludicrous. They are completely seperate communities to the freshney ward. The council want to reroute the freshney wards because we have as a strong community elected independent councillors who represent our strong community values and they cannot be beaten at the ballot box because of this strong community values and cohesion. This is nothing more than attempt by the conservative leader to take away our right to a voice and gerrymandering. We on frehsney have little in common with the other proposed areas they want to link us to.
