**Related subject:** West Marsh and surrounding wards

It is really difficult from the information provided what the proposed changes are. However, from speaking to elected members, I understand there is the proposal to move some LSOA's from West Marsh into East Marsh. This doesn't make for a good proposal. There is the main Cleve to Gy rail line separating these two wards and their communities are significantly separate by this. It would make better sense to shift the LSOA 's around with Yarborough, Freshney, Park, and Laceby village. Yarborough has undergone a major social transformation following the rebuilding of the once Yarborough estate and the demographic better connects with West Marsh for access to shops, medical provision, early years access and leisure facilities. I believe you would leave whole communities isolated if you forge ahead with your current proposal.
